

### **Amendments to the Specification:**

Please replace paragraphs [018] and [019] with the following amended paragraphs:

[018]            Fig. 5 is a top plan view of the front bulldozer blade shown in Fig. 1;  
and

[019]            Fig. 6 is a diagrammatic top plan view of the sand grooming vehicle  
and front bulldozer blade shown in Fig. 1, particularly illustrating how the front  
bulldozer blade pivots or steers with the pivotable steerable front wheel of the  
vehicle.

Delete paragraphs [019.1], [019.2] and [019.3].

Please replace paragraphs [038] and [039] with the following amended paragraphs:

[038]            A quick attachment 22 could also be provided on the rear of vehicle  
2 to allow various trailing implements to be more quickly installed on and  
removed from vehicle 2. For example, a box scraper used for grading dirt or the  
typical trailing sand grooming rake could be mounted to a female coupler 40.  
The rear of vehicle 2 would carry a male coupler 24. Male coupler 24 could be  
coupled to the rear of vehicle 2 in any suitable way including by using a four bar  
linkage 26. In any event, the box scraper, the sand grooming rake, or any other  
desired implement carried on female coupler 40 could be quickly and easily  
mounted to the rear of vehicle 2 by dropping female coupler 40 down over a rear  
mounted male coupler 24. To accommodate a rear mounted implement powered  
by its own hydraulic motor, a pair of quick couplers leading to the hydraulic pump  
on vehicle 2 could also be carried on the rear of vehicle 2 as well as on the front  
of vehicle 2.

[039]            If a quick attachment 22 and a pair of quick couplers were carried on the rear of vehicle 2, the previously described blower could be also be carried on the rear of vehicle 2 as well as on the front of vehicle 2. Thus would depend upon whether the front quick attachment 22 or the rear quick attachment 22 was used to mount blower 2.
